

A KEY TO ESSENTIAL WORK

Essential construction work doesn't just mean COVID-19 hospitals. Permitted projects by key workers also include the following:

Making safe buildings or building sites which could be a danger to the public

Repair and construction of critical roads and infrastructure

Emergency call-outs, e.g. electrical, plumbing, glazing, roofing

Making inhabited buildings safe and watertight

Domestic repairs to ensure occupant safety

Repair and maintenance of essential buildings, e.g. fire stations, food retailers

Safe repair of faulty heating and water systems

Essential inspections to prevent health outbreaks

Supply of materials for these and other COVID-19 projects

Not all essential work is obvious – so let key workers do their jobs and rebuild Scotland.
