

DOMESTIC WORK DURING LEVEL 4 LOCKDOWN

Tradespeople must **only** go into someone else's home to carry out or deliver essential work or services such as:

Safety checks, repairs, maintenance and installations of domestic utilities - e.g. electric, gas, solid fuel, water and broadband - where the work cannot be delayed

Urgent time-critical repairs and maintenance that would otherwise threaten the household's safety

Delivery, installation and repair of key domestic appliances, e.g. fridges, washing machines, cookers

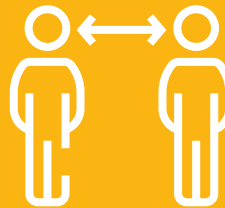

WHILE WORKING IN SOMEONE ELSE'S HOME:

Contact the household in advance to check that they are not self-isolating

Carry out appropriate risk assessments before you start work

While working in the home, stay 2 metres apart from the occupants

Always wear a face mask or face covering suitable for the task

WHILE TRAVELLING TO AND FROM A JOB:

Avoid sharing vehicles with people who aren't in your household

If you absolutely must share, keep windows open, wear a mask and sit far apart

IN EVERYTHING YOU DO:

Ensure you follow good hand and respiratory hygiene at **ALL TIMES**
